

6.6mm Square (Snap-in Type)

Dust proof with sharp operational feel suitable for general purpose.

■ Typical Specifications

| Items | Specifications |
|----------------------------|----------------|
| Rating (max.) | 50mA 12V DC |
| Rating (min.) | 10μA 1V DC |
| Initial contact resistance | 100mΩ max. |
| Travel (mm) | 0.25 |

TACT Switch™ Soldering Conditions

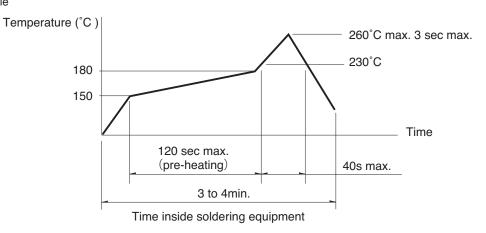

Condition for Reflow

Available for Surface Mount Type.

- 1. Heating method: Double heating method with infrared heater.
- 2. Temperature measurement: Thermocouple 0.1 to 0.2 ϕ CA (K) or CC (T) at solder joints (copper foil surface) .

A heat resistive tape should be used to fix thermocouple.

3. Temperature profile

- 1. The above temperature shall be measured of the top of switch. There are cases where the PC board's temperature greatly differs from that of the switch, depending on the material, size, thickness of PC boards and others. The above-stated conditions shall also apply to switch surface temperatures.
- 2. Soldering conditions differ depending on reflow soldering machines. Prior verification of soldering condition is highly recommended.

Conditions for Auto-dip Available for Snap-in Type and Radial Type

| Items | Condition |
|------------------------|---|
| Flux built-up | Mounting surface should not be exposed to fluk |
| Preheating temperature | Ambient temperature of the soldered surface of PC board. 100°C max. |
| Preheating time | 60s max. |
| Soldering temperature | 260°C max. |
| Duration of immersion | 5s max. |
| Number of soldering | 2times max. |
| | |

SKHH、SKPD Series

| Items | Condition |
|------------------------|---|
| Flux built-up | Mounting surface should not be exposed to fluk |
| Preheating temperature | Ambient temperature of the soldered surface of PC board. 110°C max. |
| Preheating time | 60s max. |
| Soldering temperature | 260°C max. |
| Duration of immersion | 5s max. |
| Number of soldering | 2times max. |

SKQJ、SKQK、SKEG Series

| SKQJ, SKQK, SKEG Selles | | | | | |
|-------------------------|---|--|--|--|--|
| Items | Condition | | | | |

| Preheating temperature | Ambient temperature of the soldered surface of PC board. 100°C max. | | | | |
| Preheating time | 45s max. | | | | |
| Soldering temperature | 255℃ max. | | | | |
| Duration of immersion | 5s max. | | | | |
| Number of soldering | 2times max. | | | | |

Manual Soldering (Except SKRT Series)

| Items | Condition |
|----------------------------|------------|
| Soldering temperature | 350°C max. |
| Duration of soldering | 3s max. |
| Capacity of soldering iron | 60W max. |

SKHH、SKHW、SKRG、SKPD Series

| Items | Condition |
|----------------------------|------------|
| Soldering temperature | 360°C max. |
| Duration of soldering | 3s max. |
| Capacity of soldering iron | 60W max. |

SKQJ、SKQK、SKEG Series

| Items | Condition |
|----------------------------|------------|
| Soldering temperature | 350°C max. |
| Duration of soldering | 3s max. |
| Capacity of soldering iron | 20W max. |

Notes

- 1. Consult with us for availability of TACT Switch[™] washing.
- 2. Prevent flux penetration from the top side of the TACT Switch $^{\text{TM}}$.
- 3. Switch terminals and a PC board should not be coated with flux prior to soldering.
- The second soldering should be done after the switch is stable with normal temperature.
- 5. Use the flux with a specific gravity of min 0.81. (EC-19S-8 by TAMURA Corporation, or equivalents.)
