

# POWER TRANSFORMER PC MOUNT: SPLIT PACK

## FS48-750

### **Description:**

The FS48-750 is a dual primary and dual secondary, split bobbin design which operates with either a parallel input of 115V or a series input of 230V. The output voltage will be either 48.0V with a center-tap under a 0.75A load with the secondaries wired in series, or 24.0V under a 1.5A load with the secondaries wired in parallel. The split bobbin design eliminates the need for costly electrostatic shielding.
