RUSSIA METAL

As a distributor and not a component manufacturer, Master Electronics does not manage the supply chains that our partners use to manufacture the products we stock. Master Electronics expects its suppliers to source raw materials in a manner consistent with any applicable laws, regulations and sanctions. Master Electronics also relies on its suppliers to provide proper verification of the country of origin and source of raw materials used in the products they supply to Master Electronics. This includes restrictions on iron or steel of Russian origin. However, because Master Electronics is not the component manufacturer, we cannot certify the accuracy of any information provided by third parties.

We will continue to stay in close contact with both our supplier partners and customers to help identify and navigate challenges in real time while remaining committed to complying with all applicable laws, regulations and sanctions.

Sincerely,

JASON BROWN
