

T&B® Fittings stainless steel drain adaptor

In the electrical system of a food and beverage facility and elsewhere, the T&B Fittings Stainless Steel Drain Adapter provides the means to drain accumulated moisture or small debris from stainless steel electrical enclosures for non-threaded connections. Most current solutions for this issue involve improvised breathers and require welding and caulking.

T&B's new stainless steel drain adapter provides an easy-to-install, UL® Listed drain point at any ordinary location of the electrical system where threaded connections are not possible. A stainless steel ball valve can be assembled to the drain adapter to provide the convenience of controlling and inspecting the drainage process, and by closing the valve, the assembly becomes suitable for wash-down areas.

Features & Benefits

- The drain adaptor and ball valve are NSF Certified for food and beverage applications.
- When the drain adaptor is used in conjunction with the T&B ball valve, the assembly offers a UL Type 4X rating and is suitable for wash down areas.
- The adapter and valve are both constructed of Type 316 Stainless Steel for superior corrosion resistance.
- The innovative, compact body design and special-grade silicone gasket make the drain adapter suitable for installation in tight spaces and on curved surfaces.
- Large drain orifices, an integral breather, and no moving parts ensures long-lasting performance without clogging, even when exposed to viscous liquids or small debris.
- Both the drain adaptor and the ball valve offer a 1/4" female NPT threaded connection for assembling a drain tube to direct the liquid removal.

Certifications

- cULus Listed Type 4X when the T&B ball valve is assembled to the drain adaptor
- NSF Certified per NSF/ANSI Standard 169
- Manufactured with FDA approved materials.

Cat no.	Trade size	Dim. "A"	Dim. "B"	Upc no.
FG-DA-3/8	3/8"	1.38"	.75"	78620969862(9)
DBV-1/4	1/4"	2.03"	.75"	78620969865(0)

Note: T&B also offers the ECD Drain/Breather series for threaded connections in hazardous location applications.
