(2)(1)(11)(10)

Use a contact with good contact reliability for the input. Contact bounce can lead to erroneous operation of the timer, so use a contact with short bounce time. Make the resistance between terminals for a short circuit less than 1k-ohms. Make the resistance between terminals for an open circuit greater than 100k-ohms.
2. Non-contact input (pin type example)

PM4H SERIES MODES AND TIME SETTING

1. Operation method
1) Operation mode setting [PM4H-A type]

8 operation modes are selectable with operation mode selector.

Turn the operation mode selector with screw driver.

Operation mode is shown up through the window above the mode selector. The marks are ⓄⓃ, ⒻⓁ, ⒻⓄ, ⓄⒻⒾ, ⓈⒻ, ⓄⓈ, ⓄⒻ②, ⓄⒸ.

Turn the mode selector to the mark until you can check by clicking sound.

Confirm the mode selector position if it is correct.

If the position is not stable, the timer might mis-operate.

2) Time range setting [PM4H series common]

16 time ranges are selectable between 1s to 500h.

Turn the time range selector with the screw driver.

Clockwise turning increases the time range, and Counter-clockwise turning decrease the time range.

Confirm the range selector position if it is correct.

If the position is not stable, the timer might mis-operate.

3) Time setting [common]

To set the time, turn the set dial to a desired time within the range.

Instantaneous output will be on when the dial is set to "0".

When the instantaneous output is used, the dial should be set under "0" range. (Instantaneous output area)

When power supply is on, the time range, setting time and operation mode cannot be changed.

Turn off the power supply or a reset signal is applied to set the new operation mode.

If the position is not stable, the timer might mis-operate.

2. How to use "Set ring" [PM4H series common]
1) Fixed time setting

Set the desired time and put 2 set rings together.

Insert the rings into stopper to fix the time.
2) Time range setting
Example: Time range 20s to 30s.

① Shorter time value setting
Set the dial to 20s.
Place the stop ring at the right side of stopper.

② Longer time value setting
Set the dial to 30s.
Place the stop ring at the left side of stopper.

Note) The stoppers for the lower limit setting set ring and the upper limit setting set ring face the opposite directions.
