

G&H AUDIO CONNECTORS

G&H AUDIO CONNECTORS

The *Epitome*®-Pro+ line is proud to introduce the very finest 1/4" Mono and Stereo Phone Jacks available. By eliminating a series of friction-fitted low conductive metals and instead designing a solid copper core, the signal is kept at its purest. The result is maximum signal transfer and a drastic reduction of pops, hisses, and sound coloration. To top off a great performance, these plugs are finished in your choice of fine Oak, or rare Cocobolo wood. These wooden sleeves are available with a smooth or grooved surface. All conductive surfaces are 24 CT. gold plated. Give your Headphones, microphones and mixers the performance and aesthetics they deserve!
