WHERE TO BUY

Details

- Tough silicon carbide abrasive mineral delivers consistent finishing results
- Layered, unitized construction can operate clockwise or counterclockwise directions
- Available in densities and grades ranging from soft and conformable to hard and aggressive offer utility for a wide variety of applications
- Resists smearing for cleaner surfaces and less preparation
- Minimizes heat build up to lessen impact on heat-sensitive materials

The Scotch-Brite™ EXL Unitized Wheel effectively smooths, deburrs, and finishes edges on metal alloys, plastics, and composites. Minerals and non-woven nylon fibres form an open-web material that creates an abrasive system that resists loading for more consistent results. Get durability and performance from the Scotch-Brite™ EXL Unitized Wheel.

The Scotch-Brite™ Unitized EXL Wheel features tightly layered unitized construction that allows for aggressive deburring to produce a clean edge without smearing. Designed for optimal performance on a die grinder (sold separately), the Scotch-Brite™ EXL Unitized Wheel minimizes heat build-up, making it ideal for use on heat-sensitive materials.

Suggested Applications

- Wheel edge can be dressed for effective deburring, finishing and polishing of all metal alloys and many plastics and composites

Specifications

Abrasive Material	Aluminum Oxide
Applications	Deburring, Finishing
Attachment Type	Centre Hole
Brand	Scotch-Brite™
Centre Hole Diameter (Imperial)	0.375 in
Centre Hole Diameter (Metric)	9.525 mm
Density	8
Equipment - Machines	Die Grinders
Form Type	Unitized, Wheel
Grade	Coarse
Industries	Marine, Metalworking
Maximum Speed	18100 rpm
Product Form	Wheel
Sub Industries	Builders Hardware, Medical Instruments, Metal Fabrication, Metal Implants, Plumbing Fixtures, Turbine Engines
