

Circuit Development Kits

Weidmuller offers two kits intended to make it easy to prototype simple electronic circuits. Included are:

- a prototype PCB
- screw terminals
- marking tags for the terminals
- a DIN rail mounted housing
- a worksheet to make the circuit layout easier

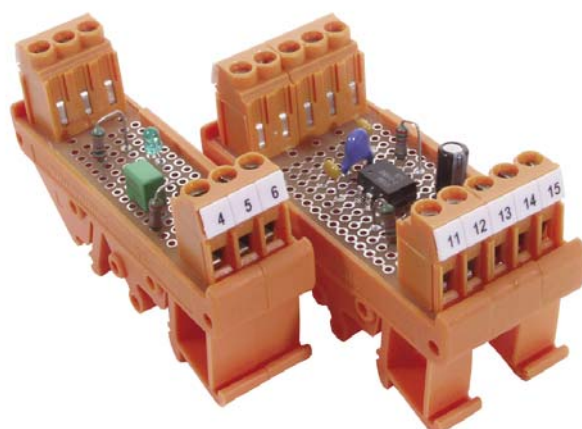

In short, you get everything you need to package a circuit and mount it on a DIN rail (32mm or 35mm) for testing / evaluation.

Two size PCBs are available - one with provision for 3 terminals per side and another with provision for 5 terminals per side. Pre-printed and blank marking tags are included.

RS70/3 version is not intended for use with integrated circuits.

Catalog numbers:

RS70/3 (2x3 pole):	7940003500
RS70/5 (2x5 pole):	7940003501
